Summary of Research Software Session
Pascale Monasse, Jesus Gonzales-Barahona, Stephan Druskat
Peter Schmidt (chair)

• Research Software plays an essential part in Open Science
• Research software must be Findable, Accessible, Interoperable and Reproducible (FAIR).
• 3 presentations to highlight different aspects on how we can adhere to FAIR principles
  • **Pascale Monasse** discussed maintenance of open source software with regards to the IPOL online review
  • **Jesus Gonzales-Barahona** raised the importance of recognising software as a core artefact of scientific output
  • **Stephan Druskat** showed us a way how open source software (e.g. in GitHub) can be citable
